

Welcome to the Supplier Performance Risk System, SPRS, Item/Price Risk Report for Services Tutorial.

To search for a Price Risk for a Service, first click the Item/Price Risk Report from the Report Menu Items. Click the dropdown select National Stock Number (NSN), PSC/Part Number, Manufacturer CAGE and Part Number, Internet Blog Serial Number (IBSN), Universal Product Code (UPC), or GS1.

Enter a 'Product and Service Code' (PSC) and part number combination under the National Stock Number' (NSN) or PSC/Part Number Material ID.

The NSN could be a NIIN or some other identifying element. If you do not have a part number or other identification, then the Price Risk for this particular service is Not Available.

Click Search.

This is an example of the Detailed Item/Price Risk report for a service.

The top of this report contains basic information on the service, including Average Price and Last Paid Date.

The middle contains Purchase History table with columns for the CAGE, last Date of Purchase, Unit Price, and Escalated Price.

Escalated Price is determined by using the U.S. Bureau of Labor Statistics Producer Price Index (PPI).

And the Escalated Price chart at the bottom contains the data in the Purchase History table and will reflect any changes made to this table.

The Purchase History graph shows the upper and lower boundary's (the control limits) of the Expected Range ± 2 standard deviations and shows Historical Escalated Prices plotted over the expected range of prices.

To see additional information on the Item/Price Risk Report and running the report, the Item Price/Risk Report Tutorial is located here: <https://www.sprs.csd.disa.mil/webtrain.htm>
